PERFORMANCE OF NON-PERFORMING ASSETS (NPA) IN STATE BANK OF INDIA

Thangam Alagarsamy, Ph.D Full-Time Research Scholar, Department of Commerce, Alagappa University, Karaikudi

Dr. S. Ganapathy, Professor, Department of Commerce, Alagappa University, Karaikudi

Abstract: The main objective of this study is performance of Non-Performing Assets (NPA) in State Bank of India. This paper is based on secondary data. The criterion is how they manage their NPA maintenance for good performance. The banking system depends on the NPA's. The directly have an impact on the profitability, liquidity and solvency position of the bank. A strong banking sector is importance for flourishing economy. The lack of success of the banking sector may have an adverse effect on other sectors. Non –Performing Assets (NPA) is one of the major responsibilities for banks in India. The researcher concluded that government and bankers has to take serious effort for decrease the NPA otherwise it thoroughly damages the bank profit of the banker and also is not good for the developing countries.

Keywords: State Bank of India, Non-Performing Assets

INTRODUCTION

State Bank of India (SBI) is an Indian multinational, public sector banking and financial services company. It is a government-owned corporation with its headquarters in Mumbai, Maharashtra. On 1st April, 2017, State Bank of India, which is India's largest Bank merged with five of its Associate Banks (State Bank of Bikaner & Jaipur, State Bank of Hyderabad, State Bank of Mysore, State Bank of Patiala and State Bank of Travancore) and Bharatiya Mahila Bank with itself. This is the first ever large scale consolidation in the Indian Banking Industry. With the merger, State Bank of India will enter the league of top 50 global banks with a balance sheet size of 33 trillion, 278,000 employees, 420 million customers, and more than 24,000 branches and 59,000 ATMs. SBI's market share will increase to 22 percent from 17 per cent. It has 198 offices in 37 countries; 301 correspondents in 72 countries. The company is ranked 232nd on the Fortune Global 500 list of the world's biggest corporations as of 20161.
Banking in India originated in the last decade of the 18th century. Commercial banks occupy a major part of the banking in India. They are the oldest form of banking institutions having large volume of operations over a vast area. They are having very good network of branches even in rural and semi-urban areas. A strong banking sector is importance for flourishing economy. The failure of the banking sector may have an adverse impact on other sectors. Non-Performing Assets (NPA) is one of the major concerns for banks in India. NPAs reflect the performance of banks. A high level of NPAs suggests high probability of a large number of credit defaults that affect the profitability and net worth of banks and also erodes the value of the asset. The NPA growth involves the necessity of provisions, which reduces the overall profits and shareholders’ value.

**NON PERFORMING ASSET**

A loan is Non-Performing when payments of interest and principal are past due by 90 days or more, or at least 90 days of interest payment have been capitalized, refinanced or delayed by agreement, or payments are less than 90 days overdue, but there are other good reasons to doubt that payment will be made in full (International monetary Fund, 2005, p8) NPAs are classified into Sub-Standard, Doubtful and Loss Assets, based on the following criteria stipulated by RBI:

i. **Sub-standard**: A loan asset that has remained nonperforming for a period less than or equal to 12 months.

ii. **Doubtful**: A loan asset that has remained in the substandard category for a period of 12 months.

iii. **Loss**: A loan asset where loss has been identified but the amount has not been fully written off.

Provisions are made for NPAs as per the extant guidelines prescribed by the regulatory authorities, subject to minimum provisions as prescribed below:

**Substandard Assets:**

i. A general provision of 15% on the total outstanding;

ii. Additional provision of 10% for exposures which are unsecured ab-initio (i.e. where realisable value of security is not more than 10 percent ab-initio);

iii. Unsecured Exposure in respect of infrastructure advances where certain safeguards such as escrow accounts are available - 20%.
Doubtful Assets:

- **Secured portion:**
  1. Upto one year – 25%
  2. One to three years – 40%
  3. More than three years – 100%

- **Unsecured portion** 100%

**Loss Assets:** 100%

**GROSS NPA**

Gross NPAs are the sum total of all loan assets that are classified as NPAs as per the Reserve Banks of India (RBI) guidelines as on Balance Sheet date. Gross NPA reflects the quality of the loan loans made by the banks. It consists of all the non-standard assets like sub-standard, doubtful and loss assets.

**REVIEW OF LITERATURE**

Dr. M. Syed Ibrahim and Dr. Rangasamy Thangavelu in their articles “A Study on the Composition of Non-Performing Assets (NPAs) of Scheduled Commercial Banks in India” the result found that the problem of Non-Performing Assets (NPAs) is a serious issue and danger to the Indian Scheduled Commercial Banks, because it destroys the sound financial positions of them. The customers and the public would not keep trust on the banks any more if the banks have a higher rate of NPAs. So, the problem of NPAs must be handled in such a manner that would not ruin the financial positions and affect the image of the banks.

Shafiqual Alam (2015), They are study, “Non Performing Loan and Banking Sustainability Bangladesh Perspective”, the study reveals that the country has been suffered from a large amount of nonperforming Loans in the banking industry mainly due to Fund diversion, Political and Board of Directors’ interference, political instability engagement of corrupted bankers, aggressive banking due to enhanced competition, falling in real estate business, weak monitoring and lack of coordination among related parties. It also found that giant defaulters and corrupted bankers have been escaped from Jurisdiction under laws mainly by using political shelter that results in creating negative impression on good borrowers, Ensuring the application of credit sanctioning guidelines and strengthening debt recovery strategy, the nonperforming loans must be reduced otherwise in near future it will bring a disaster in banking industry that may threat its sustainability.
OBJECTIVE

- To analysis the performance of NPA in state bank of India

METHODOLOGY

As far as the scope of the study is concerned, the study covers the Gross Non-Performing Assets of State Bank of India. The period of the study is Four years spanning from 2012 to 2017
