

## EDUCATION IS THE FOUNDATION OF THE WOMEN'S LIFE

**DR. ANITA SAMBHAJI PISAL / MOHITE** , Assistant Professor, Bharati Vidyapeeth University, Social Science Centre, Pune.

---

### **ABSTRACT**

*Education is the basis of life. You cannot separate yourself from education. This is an important book for every person to teach. You only need to know what you want from him. Education is the key to living life. Education of women is the most powerful tool to change the position in society. Women education in India has been a need of the hour, as education is a foundation stone for the empowerment of woman. Education also brings a reduction in inequalities and functions as a means of improving their status within the family and develops the concept of participation. Therefore, 'education is everything, education must be done first'.*

*The overall development of women life depends on his education. The more he gains knowledge in education, the more he gets to the pinnacle of education. Women can play an important role in making the country an economic superpower and an effective Nation.*

### **INTRODUCTION**

The foundation of the education and personality of the students is laid in the school itself, the success of the next education depends on the education and the culture, the

---

values received in the school. Since the future of the country depends on the education available in the school, the importance of school education is unique.

Education is the process of learning from the birth of a human being to death. That is the reason for our society. You've just got to reach your primary needs and the resources available. We are neglecting the progress, development and opportunities of the country.

### **Mahatma Jyotiba Phule's views on education**

Trusting in the trinity of freedom, equality and fraternity and voicing opposition to social inequality. Flowers were great legends. He is known as Martin Luther of Maharashtra. They were humanitarian considerations. He strongly opposed Macaulay's argument that flowers were opposed to the idea that 'education should pass from upper class to lower class', because the emphasis was on learning English first and then teaching lower class. On having a system of education in such a way that 'first educate the lower classes and then educate the upper classes', then there was no foundation then first foundation, then the peak. Flowers were insistent. Emphasis was placed on implementing the formula 'Education for the expectant' after the education of the first neglect.

#### **Mahatma Flowers Education Ideas**

- The pursuit of female education
- Primary education compulsory and free
- Provision of a trained teacher
- Paying attention to primary education
- Education of children in rural areas
- Education for the Shudras for nation building
- Think of radical changes in the education system
- Vocational and technical education
- Adoption of a three-dimensional formula
- Scholarship and hostel facilities

- Education knowledge and thoughts

### **Education Knowledge and Thoughts**

Education is considered as the third eye and hence M / s. Flowers has shed more light on education and education, without becoming a monopoly of any one, for all to get education, spread education and increase knowledge and thinking. Flowers contributed. M .Phule established a truth-finding society and provided education for women as well as for the orphans. He also established a children's home. Thus M. Phule worked for the transformation of the society without even thinking of his own family, and so today our society is honoring all kinds of education.

### **Women's Education in India: Facts and Statistics on Importance of Female Literacy**

According to the statistics released by the latest census of 2011, India's female literacy rate is 65.46 percent, significantly lower than the world average of 79.7 percent. China, India's neighbor and the other global human resource powerhouse, proceeds with 82.7 percent female literacy rate.

It is only ironical that last September, Google celebrated the 100th birth anniversary of Asima Chatterjee, a renowned Indian woman scientist who pioneered the work on medicinal chemistry in the country.

The Right to Education (RTE) Act, introduced in 2009 making elementary education free and compulsory in the country, has been a shot in the arm for many. Nevertheless, statistics reveal the dismal gap between states – while states like Kerala paint a rosy picture of women's education in India with 92.07 percent female literacy, relatively backward states such as Bihar with 51.5 percent female literacy rate highlight the importance of sustained campaign in favour of women's education in India.

In India, it is popularly said that a woman is either someone's daughter, sister, wife, or mother, indicating the various stages of her life. Besides, it also points at the absence of female agency – in fact, it is an idea that is often considered foreign and 'imported', diluting its importance in leading a healthy life.

Performing the normative gender roles defined by the society is one of the key hurdles in women's education in India. In most of the families, especially in north India, sons are preferred over daughters. While female foeticide and infanticide may have reduced, daughters face discrimination in availing the facilities that facilitate a better life.

### **Women education is a foundation of life**

An knowledgeable woman plays a very critical function in a civilized own family and affects the mind and beliefs of its members. She is unlikely to stay silent on domestic violence in opposition to different girl or female inside the own family; and could surely help in strengthening the social material of the society. Decreased Mortality Rate a knowledgeable lady is much more likely to marry later in life enhancing the probabilities of survival of the mother and baby. Educated mothers are extra privy to their youngsters' needs and nutrition, and take well care of them ensuing in a low baby mortality rate; supplying them better health, hygiene and nutrition. According to a study it's far expected that almost 1.5 million youngsters may be saved globally, if simplest their mothers had completed secondary faculty.

Prevents Social Exclusion of Women a girl infant who doesn't pass to high school today, is most probable to work as a domestic assist in family chores in her own house in addition to other houses; in most cases best for petty sum of money. An uneducated girl or a woman is maximum possibly to paintings as home help or in severe instances driven into flesh trade; not like guys or boys who without difficulty get employed as unskilled labors not with standing being uneducated. Those girls who had worked as home assist for

their complete life styles or were into other undignified professions, get socially isolated from the society; leading to despair and different mental and bodily ailments. An educated lady on the other hand, is not going to pass for the duration of this and could in the long run brew a balanced society. Integral Development Today the growing in addition to the under developed nations try for quaint essential development; that is, they have realized that the true improvement of a country may be finished handiest when no one is left behind on the route to development. The goals of necessary and sustainable developments will be nothing greater than mere words if our women aren't educated and empowered. Women ought to be supplied an equal opportunity to face shoulder to shoulder with men, and advocated to pursue the professions they aspire- doctor , lawyer, technocrat, scientist, journalist, adventurist etc.

Women education is a foundation of society Exploring the Hidden Potential. We all must have heard about the time period 'Brain Drain', also ought to have expressed our subject about the talented individuals of a growing or underneath evolved kingdom migrating to a few different elements of world; broadly speaking to a advanced nation on the lookout for better economic opportunities and higher centers. Rather than stressing an excessive amount of on thee expertise leaving their land.

### **Importance of Female Education**

#### **Increased Literacy:.**

1. **Human Trafficking:** Women are most vulnerable to trafficking when they are undereducated and poor, according to the United Nations Inter-Agency Project on Human Trafficking. Through providing young girls with opportunities and fundamental skills, this billion-dollar industry can be significantly undermined.
2. **Political Representation:** Across the globe, women are underrepresented as voters and restricted from political involvement. The United Nations Women's programmes on

leadership and participation suggest that civic education, training and all around empowerment will ease this gap.

3. **Thriving Babies:** According to the United Nations Girls' Education Initiative, children of educated mothers are twice as likely to survive past the age of five. Foreign aid for schoolhouses and curriculum development could greatly benefit the East African country of Burundi, where nearly 16,000 children die per year.

4. **Safe Sex:** A girl who completes primary school is three times less likely to contract HIV. With these statistics in mind, The World Bank calls education a "window of hope" in preventing the spread of AIDS among today's children.

5. **Later Marriage:** As suggested by the United Nations Population Fund, in underdeveloped countries, one in every three girls is married before reaching the age of 18. In a region where a girl receives seven or more years of education, the wedding date is delayed by four years.

6. **Smaller Families:** Increased participation in school reduces fertility rates over time. In Mali, women with secondary education or higher have an average of three children. Counterparts with no education have an average of seven children.

7. **Income Potential:** Education also empowers a woman's wallet through boosting her earning capabilities. According to the United Nations Educational, Scientific and Cultural Organization, also known as UNESCO, a single year of primary education has shown to increase a girl's wages later in life by 20 percent.

8. **Thriving GDP:** Gross domestic product also soars when both girls and boys are being offered educational opportunities. When 10 percent more women attend school, GDP increases by three percent on average.

9. **Poverty Reduction:** When women are provided with equal rights and equal access to education, they go on to participate in business and economic activity. Increased earning power and income combat against current and future poverty through feeding, clothing and providing for entire families.

10.

## **CONCLUSION**

Women play an imperative role in making a nation progressive and guide it towards development. They are essential possessions of a lively humanity required for national improvement, so if we have to see a bright future of women in our country, giving education to them must be a pre-occupation Empowerment means moving from a weak position to execute a power. The education of women is the most powerful tool to change the position of society. Education also brings a reduction in inequalities and functions as a means of improving their status within the family. To encourage the education of women at all levels and for dilution of gender bias in providing knowledge and education, established schools, colleges and universities even exclusively for women in the state. The education develops the idea of participation in government, panchayats, public matters etc for elimination of gender discrimination.
