ABSTRACT

This paper provides a comprehensive analysis of India's Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM), focusing on budget allocation, physical performance indicators, and state-wise progress under various sub-schemes. The study examines the cumulative progress of the Self-Help Groups (SHGs) Bank Linkage Programme, revealing significant growth in the number of SHGs linked to banks, bank loans, and refinance assistance, indicating the program's impact on financial inclusion and grassroots empowerment. Analysis of DAY-NRLM budget forecasts and actual amounts highlights fluctuations in funding over the years, reflecting evolving priorities and policy imperatives. The allocation and utilization of funds for the Scheduled Caste Special Plan (SCSP) and Tribal Sub Plan (TSP) under DAY-NRLM demonstrate a commitment to addressing socio-economic inequities among marginalized communities. Physical performance indicators underscore the program's multi-dimensional approach, emphasizing livelihoods, entrepreneurship, skill development, and sustainable agriculture practices. Statewise progress reveals disparities in participation levels, with larger states demonstrating stronger performance compared to smaller states and union territories. The study highlights the significant impact of DAY-NRLM in promoting rural livelihoods, empowering marginalized communities, and fostering inclusive development. It underscores the need for continued efforts to address regional disparities and enhance financial inclusion for equitable access to opportunities across India.

INTRODUCTION:

India's rural areas are home to a significant portion of its population, and ensuring their economic empowerment and social development is crucial for the country's overall progress. In this context, the Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) emerges as a flagship initiative aimed at transforming rural livelihoods and empowering marginalized communities across the nation.

ISSN: 2278-6236

The DAY-NRLM, launched in 2011, operates under the aegis of the Ministry of Rural Development, Government of India, with the primary objective of alleviating poverty and enhancing rural livelihoods. Through a multi-pronged approach, the program seeks to mobilize rural households into self-help groups (SHGs), provide them with financial support, promote entrepreneurship, and facilitate skill development and sustainable agriculture practices.

Over the years, DAY-NRLM has evolved into a comprehensive framework encompassing various sub-schemes and interventions targeting specific segments of the rural population, including women, Scheduled Castes, Scheduled Tribes, and other marginalized groups. These initiatives aim to address the multifaceted challenges faced by rural communities, ranging from lack of access to credit and financial services to limited opportunities for income generation and skill enhancement.

Against this backdrop, this research paper aims to provide a comprehensive analysis of the DAY-NRLM initiatives, focusing on key aspects such as budget allocation, physical performance indicators, state-wise progress, and the impact of specific sub-schemes. By examining trends, challenges, and achievements, this study seeks to offer insights into the effectiveness and reach of DAY-NRLM in promoting rural livelihoods, empowering marginalized communities, and fostering inclusive development across India.

Through a combination of quantitative data analysis and qualitative assessment, this paper aims to contribute to the existing literature on rural development policies and programs in India. By highlighting the successes and challenges of DAY-NRLM, it intends to inform policymakers, practitioners, and stakeholders about the program's achievements and areas for improvement, ultimately guiding future interventions aimed at sustainable rural development and poverty alleviation.

REVIEW OF LITERATURE:

The existing literature on India's DAY-NRLM initiatives offers valuable insights into various aspects of the program, ranging from its inception and evolution to its implementation strategies and outcomes. Several studies have highlighted the importance of SHGs in

ISSN: 2278-6236

promoting financial inclusion, women's empowerment, and community development (Ghate & Ramola, 2018; Kabeer & Nambissan, 2019). These studies underscore the role of SHGs as platforms for social mobilization, collective action, and economic empowerment among marginalized groups.

Furthermore, research on DAY-NRLM's budgetary allocations and expenditure patterns sheds light on the program's funding dynamics, resource utilization, and fiscal management practices (Sharma & Singh, 2020; Chakraborty & Chakraborty, 2021). These studies highlight the need for greater transparency, accountability, and efficiency in resource allocation to ensure optimal outcomes and impact on the ground.

Moreover, studies focusing on DAY-NRLM's physical performance indicators provide insights into the program's achievements in terms of SHG formation, household mobilization, skill development, and entrepreneurship promotion (Sahu & Choudhury, 2019; Nayak & Mishra, 2020). These studies underscore the importance of monitoring and evaluation frameworks to assess the program's progress, identify bottlenecks, and facilitate evidence-based decision-making for program improvement.

However, despite these contributions, there is a dearth of research that comprehensively examines DAY-NRLM's overall impact, effectiveness, and challenges, particularly in relation to regional disparities, marginalized communities' inclusion, and sustainability concerns. Addressing this research gap is essential for enhancing understanding, informing policy formulation, and guiding interventions aimed at advancing rural development and poverty alleviation in India.

OBJECTIVES OF THE PAPER

1. To analyse the role of DAY-NRLM in promoting rural livelihoods and inclusive development.

METHODOLOGY

Thestudy collected secondary datafrom various sources, including government reports, official publications, and scholarly articles. The data will be analysed using descriptive statistics, trend analysis, and comparative analysis techniques to examine budget forecasts, expenditure patterns, physical performance indicators, state-wise disparities, and fund allocation/utilization under DAY-NRLM. Additionally, a systematic review of the literature

ISSN: 2278-6236

will be conducted to identify existing research gaps and emerging trends in DAY-NRLM implementation.

Data analysis

Note: Data relate to Commercial Banks, RRBs, and Co-operative Banks.: From 2006-2007 onwards, data on the number of SHGs financed by banks and bank loans are inclusive of Swarnajayanti Gram Swarozgar Yojna (SGSY). SHGs and existing groups receive repeat loans. Owing to this change, NABARD discontinued the publication of data on a cumulative basis from 2006-2007. Source: Reserve Bank of India.

Table 1 presents the cumulative progress of the Self-Help Groups (SHGs) Bank Linkage Programme in India from 1992-1993 to 2021-2022. The number of SHGs linked to the bank has seen significant growth over the years, from 255 in 1992-1993 to 3,398,267 in 2021-2022. This reflects the increasing popularity and effectiveness of the SHGs Bank Linkage Programme in promoting financial inclusion and self-reliance among marginalized communities. The cumulative bank loan amount and refinance assistance have also witnessed substantial growth over the years. While specific loan amounts are not provided for the recent years, the increasing trend indicates the rising financial support extended to SHGs for income-generating activities and entrepreneurship development. Refinance assistance plays a crucial role in supporting the SHG Bank Linkage Programme by providing funds to banks and financial institutions for lending to SHGs at concessional rates. The cumulative refinance assistance has steadily increased, reaching 101,019 crores in 2021-2022. The cumulative data demonstrates the significant impact of the SHG Bank Linkage Programme in empowering grassroots communities, particularly women, by providing access to financial services, fostering savings habits, and promoting entrepreneurship at the grassroots level.

Table 2Budget, revised estimates, and amount released under India's DAY-NRLM (2013-2014 to 2016-2017 and 2021-2022 to 2023-2024) (Rs. in Crore)

Table 2 Analyzing India's Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) budget forecasts, amended estimates, and actual amounts. Budget and updated estimates vary over time. In 2013-2014 and 2014-2015, budget estimates were established at ₹4000 crore, but updated forecasts were much lower, indicating a decrease in allocated money. In contrast, the 2015-2016 budget and revised estimates remained stable at ₹2705 crore, showing stable funding. Actual amounts typically fall short of budget and updated expectations. In 2013-2014 and 2014-2015, actual releases were much lower than budget and revised predictions, showing difficulties using funds efficiently. In 2015-2016, the actual amount disbursed was closer to the revised forecasts, suggesting greater use efficiency or alignment between planned expenditure and actual needs. The DAY-NRLM initiative's budgetary changes reflect changing objectives or conditions. Fiscal limitations or program priority reevaluation may have caused the 2013-2014 and 2014-2015 negative revisions. Later budget predictions, such as 2021-2022 to 2023-2024, imply a renewed focus on rural livelihood development, either in reaction to socioeconomic constraints or policy imperatives. From 2013-2014 to 2022-2023, the table shows monies allocated for the Scheduled Caste Special Plan (SCSP) and Tribal Sub Plan (TSP) under the Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) in India. The SCSP and TSP monies have consistently increased over the years, demonstrating a commitment to meeting SC and ST development needs. This tendency indicates the government's recognition of SCs and STs' historical disadvantages and its efforts to empower them. DAY-NRLM receives far more funding than SCSP and TSP. While allocation has increased, it may not be proportionate to population size or SC and ST disadvantage. The disparity shows that SCs and STs need more targeted and substantial expenditures to alleviate socioeconomic inequities. SCSP and TSP monies have grown steadily, reflecting DAY-NRLM's commitment to SC and ST community development. This continuous rise shows a long-term commitment to inclusive development and social justice.

Physical performance metrics for India's Deendayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) as of June 30, 2023. Since its launch, 85.14 lakh SHGs have been promoted. This shows widespread community resource mobilization for self-help and empowerment. As many as 9.21 crore families have joined SHGs. This shows that the initiative reached rural households and encouraged economic involvement. SHGs received ₹32,974 crore in financing support to invest in and sustain income-generating activities. SHGs need this support to establish financial resilience and promote sustainable livelihoods. Financial institutions play a crucial role in supporting the economic activities of grassroots groups, with ₹6,79,700 crore in bank loans issued to SHGs. Credit helps SHGs invest in livelihoods and grow. SVEP funding for 2.39 lakh firms promotes rural entrepreneurship and small-scale enterprise development. This project boosts local economies, jobs, and revenue. The support given to 284 thousand Mahila Kisans for agro-ecological techniques emphasizes sustainable agriculture and women's engagement. This initiative supports woman empowerment and environmental sustainability. - The DDU-GKY has taught 1,472,282 individuals, demonstrating the relevance of skill development in rural youth employment and livelihood chances. RSETIs have trained 4,533,015 people, enabling them to pursue entrepreneurship and self-employment. The physical performance indicators show the DAY-NRLM's multi-dimensional approach to livelihoods, entrepreneurship, skill development, and sustainable agriculture practises, enabling inclusive and holistic rural development.

Table -5 presents the physical progress under the Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) in India for the years 2020-2021 to 2022-2023. There is a target set for the social mobilization of SHGs each year. The progress in achieving this target varies across the years. In 2020-2021, the progress was relatively close to the target, with around 602,329 SHGs mobilized against a target of 646,387. In subsequent years, while the target for social mobilization increased, the progress remained relatively lower, indicating potential challenges or limitations in achieving the set targets. The provision of RF and CIF to SHGs is another important aspect of the program. It aims to provide financial support for income-generating activities and community-level investments. The targets for providing RF and CIF to SHGs increased each year, reflecting an expansion of the program's reach and objectives. The progress in providing RF and CIF shows varying levels of achievement compared to the targets. For example, in 2020-2021, the progress in providing RF and CIF was significantly lower than the targets set for both categories. Despite fluctuations in progress, there is an overall improvement in the physical progress indicators from 2020-2021 to 2022-2023. The target numbers for social mobilization and the provision of RF and CIF increased each year, indicating a scaling up of efforts to reach more SHGs and provide them with financial support.

Table 6 shows how DAY-NRLM money were allocated and used for India's National Rural Economic Transformation Project (NRETP) sub-scheme. State funds released or used. The amount of cash used for the intended purposes. Bihar, Chhattisgarh, and Odisha have used a lot of NRETP funding, suggesting active implementation. However, Gujarat and Tamil Nadu have lower consumption rates. State funding allocations show regional differences in NRETP project implementation. States with higher utilization rates may have more NRETP project capacity or demand. Nationally, 61.6% of the federal allocation of ₹266,082.5 lakh has been utilized, with a release rate of ₹163,979.4 lakh.These numbers show the success and effectiveness of the NRETP sub-scheme under DAY-NRLM in different states, enabling informed decision-making and targeted interventions to maximize budget use and rural economic transformation.

Table 7 presents the state-wise cumulative data on the number of Self-Help Groups (SHGs) formed and women households mobilized into SHGs under the Deendayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM) in India from 2011-2012 to 2023-2024. Uttar Pradesh has the highest number of SHGs formed (722,032) and women households mobilized into SHGs (7,515,144) among all states. Bihar follows Uttar Pradesh with a substantial number of SHGs formed (1,096,939) and women households mobilized into SHGs (12,674,972). Similar to Uttar Pradesh, Bihar's high participation suggests widespread acceptance and engagement with the program objectives. Ladakh has the lowest number of SHGs formed (585) and women households mobilized into SHGs (4,539). The relatively small population and unique geographical challenges in Ladakh may contribute to the lower participation compared to other states. This union territory has the second-lowest number of SHGs formed (956) and women households mobilized into SHGs (9,953). There are clear regional disparities in the participation levels, with states like Uttar Pradesh and Bihar demonstrating high engagement, while states and union territories like Ladakh and Daman and Diu and Dadra and Nagar Haveli show lower involvement.

ISSN: 2278-6236

Livelihoods Mission (DAY-NRLM) in India from 2018-2019 to 2022-2023. Uttar Pradesh consistently ranks among the top performers in terms of households mobilized and SHGs promoted. It has the highest numbers in both categories across all years. In 2022-2023, Uttar Pradesh mobilized 804,472 households and promoted 814,783 SHGs, maintaining its lead throughout the period. Bihar follows Uttar Pradesh closely in terms of performance, consistently securing the second position. In 2022-2023, Bihar mobilized 517,85 households and promoted 588,507 SHGs, demonstrating significant engagement with the program objectives. West Bengal consistently ranks among the top states, with substantial numbers of households mobilized and SHGs promoted. In 2022-2023, West Bengal mobilized 120,092 households and promoted 1,035,392 SHGs, contributing significantly to the program's objectives.Lakshadweep, being a small union territory, typically has lower numbers compared to larger states. In 2022-2023, it mobilized 17 households and promoted 171 SHGs, reflecting its relatively small population size and unique geographical challenges. Dadra & Nagar Haveli also has lower numbers compared to larger states, indicating limited participation. In 2022-2023, it mobilized 2,121 households and promoted 19,231 SHGs, showing a moderate increase compared to previous years. Uttar Pradesh, Bihar, and West Bengal consistently demonstrate strong performance, indicating sustained engagement with the program objectives.

CONCLUSION

The paper provides a comprehensive analysis of various aspects of India's Deen Dayal Antyodaya Yojana-National Rural Livelihoods Mission (DAY-NRLM), shedding light on its budget allocation, physical performance indicators, and state-wise progress under different sub-schemes.

The Self-Help Groups (SHGs) Bank Linkage Programme has shown remarkable growth over the years, indicating its effectiveness in promoting financial inclusion and self-reliance among marginalized communities. The cumulative data reveals a substantial increase in the number of SHGs linked to banks, along with significant growth in bank loans and refinance assistance, reflecting the program's impact on empowering grassroots communities, particularly women.

ISSN: 2278-6236

Analysis of DAY-NRLM budget forecasts, amended estimates, and actual amounts highlights fluctuations in funding over the years, reflecting changing objectives or conditions. While some years witnessed decreases in allocated funds, others showed stable funding or renewed focus on rural livelihood development, indicating evolving priorities and policy imperatives.

The allocation and utilization of funds for the Scheduled Caste Special Plan (SCSP) and Tribal Sub Plan (TSP) under DAY-NRLM demonstrate a commitment to meeting the development needs of marginalized communities. However, disparities in funding compared to DAY-NRLM indicate the need for more targeted and substantial expenditures to alleviate socio-economic inequities among Scheduled Castes and Tribes.

Physical performance indicators underscore the multi-dimensional approach of DAY-NRLM, focusing on livelihoods, entrepreneurship, skill development, and sustainable agriculture practices. The data highlights widespread community mobilization, household participation, and financial support provided to SHGs, emphasizing inclusive and holistic rural development.

State-wise progress under various sub-schemes reveals disparities in participation levels, with states like Uttar Pradesh, Bihar, and West Bengal demonstrating strong performance, while smaller states and union territories show lower involvement, possibly due to unique geographical challenges or limited resources.
